

Cleaning Safety Do's and Don'ts

When it comes to your everyday cleaning routine, it's important to remember and prioritize safe storage. Creating proper storage habits from the moment you bring your baby home will help you avoid accidents as your child grows up and begins exploring.

Do:

- ✓ Store cleaning products out of sight and reach of children.
- ✓ Read and follow the product label.
- ✓ Put the poison center number (1-800-222-1222) in your phone.

Don't:

- ✗ Store cleaning products outside of their original containers.
- ✗ Put cleaning products within reach of children, even while using them.
- ✗ Mix cleaning products together.
