Resource Toolkit
Heading back to school this fall? Tired of calling your parents every time you have a cleaning question?

The American Cleaning Institute knows that for many of you, cleaning is a new task, and that managing your cleaning responsibilities can be overwhelming. And while cleaning might seem like just another chore, it plays a critical role in protecting against illnesses that can easily spread throughout dorms and campus living. Cold, flu, mono, and norovirus? No, thank you.

Use the Class of Clean toolkit to help you make cleaning an easy part of your daily routine.

MOVE IN CHECKLIST
As you head to campus, rely on this checklist to give your new home and year a clean and fresh start.

STAIN REMOVAL GUIDE
This easy guide can help you tackle any stain, whether it is from the dining hall, an afternoon playing sports, or a night out.

CLEANING WITH A SICK ROOMMATE
Between you and your roommate(s), someone is bound to get sick. And in close quarters, germs can move quickly. Keeping a clean space can prevent germs from spreading. This resource shares easy tips and tricks to keep your room or home clean and healthy.

LAUNDRY 101: LAUNDRY GUIDE
There is nothing better than fresh clothes and bedding – something many college students might not see very often. This laundry guide focuses on all things laundry, from how to sort your clothes to what water temperature is best.

THE GOOD ROOMMATE CHECKLIST
Divide and conquer cleaning chores between your roommate or housemates with this helpful daily and weekly checklist.
Move In Checklist

Move In Cleaning Tips
After you’ve unloaded your boxes, give your new space a clean start.

Move In
ROOM FEATURES:
- Door handles
  - Clean
  - Disinfect
- Light switches
  - Clean
  - Disinfect
- Floors
  - Vacuum or sweep, starting from the farthest corner and working toward the exit
- Bed Mattress
  - Vacuum and clean, consider disinfecting to get rid of dust mites, then top with a mattress cover and sheets

FURNITURE:
- Desk and chairs
  - Clean
  - Disinfect
- Bed frame
  - Clean
- Drawers and shelves
  - Clean
  - Disinfect

Have a Bath or Kitchen?
In the bathroom: disinfect sink areas, toilet bowls, tubs and showers to kill germs, as well as mold and mildew.
In the kitchen: clean and disinfect cabinets and surfaces. Clean oven with an oven cleaner. Clean refrigerator walls and shelves using a nonabrasive, all-purpose cleaner.

#DYK
While it may seem obvious, there are big differences between cleaning and disinfecting.

Clean to remove dirt from the surface, using an all-purpose cleaner or soap and water.

Disinfect to kill germs.

Important Tip: Read the disinfectant label prior to using. Pay attention to how long it needs to remain on the surface to ensure effectiveness.

Checklist & Tips
Use this visual checklist as you arrive on campus to move in cleanly, and move out freely.

# Stain Removal Guide

## Common College Stains & How to Clean Them
Dealing with a stubborn stain? Use this guide to help you get the tough ones out.

### Drinks
1. Sponge or soak stain in cool water for about 30 minutes.
2. Pretreat with stain remover.

### Coffee/Tea
1. Sponge or soak stain in cool water.
2. Pretreat with stain remover.
3. Wash with laundry detergent and either oxygen bleach (a bleach that doesn’t contain chlorine), or if safe for the fabric, chlorine bleach.

### Cosmetics
1. Pretreat with stain remover or rub with bar soap.
2. Wash with laundry detergent.

### Grease/Oil
1. Place stain face down on clean paper towels. Apply stain remover or liquid laundry detergent to back of stain.
2. Let dry and rinse, then wash with laundry detergent, using the hottest water that’s safe for the fabric.

### Deodorants
1. Pretreat with stain remover or liquid laundry detergent.
2. Wash with laundry detergent.

### Ink
1. Pretreat with stain remover or liquid laundry detergent.
2. Wash with laundry detergent.

### Bodily Fluids
1. Use a stain remover or rub with bar soap.
2. Wash with laundry detergent. If perspiration has changed the color of the fabric, apply ammonia to fresh stains or white vinegar to old stains, then rinse.

### Perspiration
1. Use a stain remover or rub with bar soap.
2. Wash with laundry detergent.

### Safety 101
- Don’t mix cleaning products.
- Keep cleaning products in their original containers with labels intact.
- Read and follow label directions when cleaning and disinfecting.
- Open doors and windows to ensure adequate ventilation.

## Guide Poster
Keep this visual guide handy as you navigate the world of laundry.

Sick Roommate Guide

When you live in close quarters, germs can spread quickly. If you or your roommate feel ill, follow the steps below to keep germs from spreading.

CLEANING FOR ILLNESS PREVENTION

- Disinfect daily, especially items the sick person has touched.
- Once your roommate feels better, wash or disinfect all the devices and surfaces touched while sick.
- Make sure you and anyone sick washes their hands more frequently, following proper handwashing practices.
- Have hand sanitizer readily available for when washing with soap and water isn’t convenient or practical (e.g., carry it with you as you move about campus and use it before eating).
- Avoid sharing laptops, phones, pens/pencils, drinks, etc.

What’s the Difference?

Cleaning: Removing unwanted contaminants, such as soil, dirt and grease, from a surface, material, or your hands, using soap and water or a proper surface cleaner.

Sanitizing: Reducing (but not necessarily eliminating) the number of bacteria on the surface to levels considered safe as determined by public health codes or regulations.

Disinfecting: Irreversibly inactivating pathogens (microorganisms that may cause infections and disease) including bacteria, viruses and fungi.

Checklist & Tips

Stay healthy, even in shared, small spaces, with this checklist and guide.

Laundry 101

INTRO TO SORTING

SORT BY COLOR
To keep light colored clothes from picking up dark dyes, wash whites separately; pastels and medium colors together; bright and darks by themselves.

SORT BY SOIL
Sort those really dirty items away from the slightly dirty ones, since slightly dirty items can pick up the extra soil from the wash water.

LAUNDRY LAB: WASHING MACHINE SETTINGS

1. Select your load size. The perfect load size will be around a medium load that leaves a few inches at the top of the washer.
2. Follow instructions on washer or on the product label when adding detergent.
3. Choose water temperature. Most can be washed in cold (which is also eco-friendly) but you may need warmer water to remove some stains (check the stain guide).
4. If your washer has a soil level setting, think about how dirty your clothes are. Put dirtier items like sports uniforms and workout gear on a higher soil level than your everyday clothing.
5. Add your liquid detergent either into the drum of the machine, or into the detergent tray. If using fabric softener, add it to the softener tray. If using liquid laundry packets, add the packet to the drum of your washing machine before adding your clothes.

The Good Roommate Checklist

Everyone likes to come home to a clean space. Here’s how to easily conquer cleaning chores with your roommate.

**LIVING SPACE**
- **DAILY**
  - Clean & consider disinfecting frequently-touched surfaces.
  - Clean visible messes.
  - Pick up personal items.
- **WEEKLY**
  - Vacuum and/or sweep.
  - Dust.

**KITCHEN/KITCHENETTE**
- **DAILY**
  - Clean & consider disinfecting frequently-touched surfaces (countertops, refrigerator door, etc.).
  - Clean visible messes and crumbs.
  - Wash dishes.
  - Put away food.
- **WEEKLY**
  - Clean out refrigerator and toss any expired or old food.
  - Clean inside and outside of microwave.
  - Vacuum, sweep and/or mop.

**BATHROOM**
- **DAILY**
  - Clean & consider disinfecting frequently-touched surfaces.
  - Clean visible messes.
  - Pick up and organize personal items.
- **WEEKLY**
  - Clean toilet.
  - Clean sink and countertop.
  - Clean shower/bath.
  - Vacuum, sweep and/or mop.
  - Wash towels and bathmats.

**SAFETY 101**
- Don’t mix cleaning products.
- Keep cleaning products in their original containers with labels intact.
- Read and follow label directions when cleaning and disinfecting.

**TIP!**
Keep clutter to a minimum and take advantage of storage where you can, like using under the bed storage. Having lots of stuff around makes cleaning harder and gives dust room to collect. Since dust triggers asthma and allergies, wipe down surfaces like light fixtures, blinds, window frames and baseboards, using a clean cloth and some dusting product.

Checklist & Tips
Use this visual checklist to cover all your chores in your new space.
